PULP-X
PULP DEVITALIZER

Product Description:
Pulp-X is a devitalizer paste which provides powerful pulp devitalizing properties due to paraformaldehyde. It is a fast acting and pain relieving paste, easy to apply.

Composition:
Formaldehyde liquid, Eugenol, Parachlorophenol, Polyethylene Glycol, Fumed Silica and excipients.

Indications:
Pulp Devitalizer prior to mortal extirpation or amputation. Residual devitalization after removal of non-vital pulp tissue.

Instructions for Use:
Eliminate as far as possible, the dentine of the decayed cavity in order to ensure close contact with the pulp. Close contact of the paste with the pulp accelerates the devitalizing process. Insert a pellet of paste into the base of the cavity and seal hermetically with a temporary cement. Devitalization is completed within five to seven days. After devitalization, a permanent root canal filling can be placed once the pulp is totally removed and pain relief is complete.

Warning:
Contains formaldehyde which can be toxic by inhalation or ingestion. Contact with the skin may cause irritation, burns of hypersensitivity. If contact with skin occurs immediately wipe off thoroughly with cotton and alcohol and then wash well with soap and water. If skin rash and sensitization or other allergic reaction occurs discontinue use and seek medical attention. If the product comes into contact with the eyes, rinse thoroughly with fresh water and consult a physician. It should not be used with patients who have a history of severe allergic reaction to any of the components.

Storage Conditions:
Store at room temperature between 10°C to 24°C and protect from direct light. Close the jar/ syringe carefully after use. Keep away from moisture. Shelf life not affected after opening if stores in a cool dry place. If not to be used for a longer duration, keep them in refrigerator. Allow material to reach room temperature prior to use.

Shelf life: 3 years from the date of manufacturing.
