ACTINO

DENTAL ETCHING LIQUID

Product Description : Actino is a Blue tinted viscous liquid of 37% Phosphoric acid, silica free composition recommended for use on enamel and dentine. Its non drying thixotropic liquid composition prevents thickening and dry out with time and thus maintain its flow characteristics.

Composition: Phosphoric Acid, Methylene Blue Dye, Purified Water and Thickening agent.

Intended Purpose / Intended Use: It is intended for use on tooth to prepare the surface for bonding.

Indications for Use: Used for conditioning both dental enamel and dentine surfaces prior to the placement of an adhesive restoration.

Instructions for Use: Clean the area to be etched, rinse and dry thoroughly. Place the tip against the surface to be etched and slowly dispense the liquid on the surface to lay a fine line or paint a thin layer to the areas to be etched. Allow the liquid to stay for 10-15 seconds and rinse thoroughly with water spray. Dry etched tooth surface with clean, dry air. The dispensed material shall not be placed back in container and the dose once applied and used shall not be reused.

Warning: Avoid prolonged or repeated contact with skin (allergic contact dermatitis), and eyes. Avoid prolonged inhalation. Do not take internally. Contact with the skin may cause irritation, burns of hypersensitivity. If contact with skin occurs immediately wipe off thoroughly with cotton and alcohol and then wash well with soap and water. If skin rash and sensitization or other allergic reaction occurs discontinue use and seek medical attention. If the product comes into contact with the eyes, rinse thoroughly with fresh water and consult a physician.

Precautions: The product contains phosphoric acid. It can burn and cause irritation to the tissues and therefore confine the use to areas to be etched. Avoid contact with eyes and prolonged contact with skin.

Contraindications: The products contains 37% Phosphoric acid, so the product should not be used with patients who have a history of severe allergic reaction to any of the components.

Storage Conditions: Store at temperature between $10^{\circ}C(50^{\circ}F)$ to $24^{\circ}C(75^{\circ}F)$. Close the cap carefully after use. Keep away from moisture. Shelf life not affected after opening if stored in a cool dry place.

Shelf Life:

3years under proper storage.

Presentation:

Ref: 10009

10ml Plastic dropper bottle

Disposal conditions: To be disposed off based on the prevailing rules of the country in which it is used.

The material has been developed solely for professional dental use. Application should be carried out strictly according to the instruction for use. Liability cannot be accepted for damages resulting from failure to observe the instructions of the stipulated area of applications. The user is responsible for testing the material for its suitability and use for any purpose not explicitly stated in this instruction sheet.
