BIOENAMEL RE-MINERALIZING & DESENSITIZING GEL

Product Description : BioEnamel is a re-mineralizing gel which reduces post whitening sensitivity and effectively enhances the re-mineralization of the enamel. Composition :

Glycerine, Potassium Nitrate, Bioglass, Carbopol.

Indications :

- Remineralization of de-mineralized tooth structure.
- Post whitening sensitivity.

Sensitivity caused due to non-carious lesions and sensitivity after oral prophylaxis.
Instructions for Use :

◆ Bio Enamel is presented in a convenient dispenser pen with paint on brush for easy application. The gel will be dispensed on the brush tip by gently rotating bottom of the pen clockwise. First time use requires additional rotations for the gel to appear on the brush tip.

◆ Brush your teeth each time before applying BioEnamel. BioEnamel is more effective on clean teeth.

Apply a small amount of BioEnamel in a thin layer and cover the entire area under treatment.

Avoid lips from contacting teeth for 30 - 60 sec.

◆ Leave the BioEnamel on the tooth surface and avoid rinsing, brushing your teeth for 4 to 6 hours.

ApplyBioEnamel as often as needed.

Caution :

Always close the pen with lid after use to avoid drying of the gel on the brush bristles. Contra-Indications :

This product is contra-indicated for use in or by individuals who have known hypersensitivity to any of the constituents of the products.

Storage Conditions : Store at temperature between 10°C to 24°C. Close the cap carefully after use. Keep away from moisture. Shelf life not affected after opening if stored in a cool dry place.

Shelf Life: 3 years from the date of manufacturing.

Ref. 90012
