EDTA SOLUTION

(17% EDTA SOLUTION)

Product Description: 17% EDTA Solution buffered to neutral pH used for preparation of roots canals by rapid cleansing and enlarging of roots canals.

Composition: Disodium Edetate, purified water and excipients.

Intended Purpose / Intended Use: It is intended to be used as an irrigant during root canal treatment

Indications for Use: For root canal cleansing and shaping during instrumentation. EDTA Solution helps in opening calcified canals and smear layer removal.

Instructions for Use: Transfer portion of solution from the bottle to a disposable syringe fitted with a disposable needle. Insert the needle into the root canal until resistance is felt and withdraw about 2mm. Inject the solution slowly into the canal to irrigate debris and to chelate the canal walls. The dispensed material shall not be placed back in container and the dose once applied and used shall not be reused.

Warning: Avoid prolonged or repeated contact with skin (allergic contact dermatitis), and eyes. Avoid prolonged inhalation. Do not take internally. Contact with the skin may cause irritation, burns of hypersensitivity. If contact with skin occurs immediately wipe off thoroughly with cotton and alcohol and then wash well with soap and water. If skin rash and sensitization or other allergic reaction occurs discontinue use and seek medical attention. If the product comes into contact with the eyes, rinse thoroughly with fresh water and consult a physician.

Precautions: Avoid injecting solution beyond apex of canal.

Contraindications: It should not be used with patients who have a history of severe allergic reaction to any of the components.

Storage Conditions: Store at temperature between $10^{\circ}\text{C}(50^{\circ}\text{F})$ to $24^{\circ}\text{C}(75^{\circ}\text{F})$. Close the cap carefully after use. Keep away from moisture. Shelf life not affected after opening if stored in a cool dry place.

Shelf life: 3 years from the date of manufacturing.
