

Cal LC®

Light Cured, Radiopaque, Calcium Hydroxide Paste

Cal LC is a light cure, radiopaque calcium hydroxide paste useful in pulp capping and as a protective base/liner under permanent restorative materials.

Indications

- Direct & indirect pulp capping
- Cavity lining under restorative material
- Liner/Base in deep seated cavities where thermal insulation to pulp is mandatory

Benefits

- Light cure base/liner
- Stimulates secondary dentin formation
- Convenient single component, syringe dispensing
- Insoluble in oral fluids
- Protects the pulp from chemical irritation
- Compatible with all types of restorative materials
- Low polymerization shrinkage
- Superior strength comparable with glass ionomer base

Chemistry

Cal LC is calcium hydroxide in photo - polymerisable resin-difunctional monomers matrix.

Technical Data

- 1) Curing Time : 30 - 40 sec.
- 2) Flexural Strength : 80 MPa.

Pulp exposure

Placement of Cal LC

Light Curing for 30 Seconds

Completed pulp capping

Completed restoration

Presentation

Ref. : 30004
(Trial Pack : 1 x 2g Syringe + 5 x Applicator Tips, 1 x Instruction Manual)
Ref. : 30005
(Intro Pack : 2 x 2g Syringes + 10 x Applicator Tips, 1 x Instruction Manual)
Ref. : 30005-1
(Economy Pack : 4 x 2g Syringes + 20 x Applicator Tips, 1 x Instruction Manual)
