Oradox ENAMEL CARE

Product description: Oradox ENAMEL CARE is a target specific oral swish which strengthens the enamel and protects gums.

Salient features:

- It is a speciality based mouthwash.
- Advanced formulation comprising of Hydroxyapatite, Sodium Fluoride, Hesperidin, Cinnamon oil and Tea Tree Oil.
- Reduces inflammation and oxidative stress in the oral cavity.
- It helps to remineralize and strengthen tooth enamel.
- Lemon flavor freshens breath.
- Reduces microbial load of the oral cavity.

Key ingredients:

Hydroxyapatite has the ability to remineralize and strengthen tooth enamel. When applied, it helps repair and restore the minerals lost from the enamel due to demineralization caused by acids and bacteria.

Tea Tree Oil is known for reducing the microbial load in the mouth and helps to prevent enamel erosion and tooth decay.

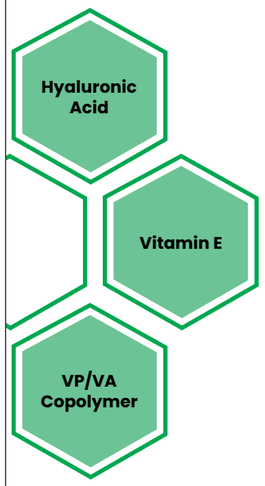

Cinnamon Oil helps to reduce the growth of bacteria responsible for causing dental caries and periodontal diseases.

Hesperidin is a bioflavonoid, helps to reduce the inflammation and oxidative stress in the oral cavity and contributes to maintaining healthy enamel & gum tissues.

Sodium fluoride prevent tooth decay and strengthen tooth enamel. It works by enhancing remineralization and inhibiting the demineralization process.

Oradox RENEW

Product description: Oradox RENEW is a speciality based oral rinse for healing and repair of mouth ulcers, inflamed & bleeding gums, gum recession, denture and orthodontic abrasion. It is an advanced formula enriched with Vitamin E, which is an antioxidant that protects oral tissues from oxidative damage caused by free radicals.

Salient features:

- It is a site specific oral rinse.
- Unique blend of Hyaluronic Acid , Vitamin E and VP/VA (Vinylpyrrolidone/ Vinyl Acetate).
- Assists in healing process of oral wounds.
- Provides hydration and lubrication to tissues.
- Forms a protective film on oral tissues, which may prevent bacterial adhesion and plaque formation.
- Reduces oral inflammation and discomfort.

Key ingredients:

Hyaluronic Acid in mouthwash helps promoting oral health by providing hydration and lubrication to oral tissues, helping to alleviate dry mouth symptoms.

Vitamin E in mouthwash may contribute to oral health by acting as an anti-oxidant, helping to protect oral tissues from oxidative damage caused by free radicals.

VP/VA Copolymer in mouthwash can help enhance oral health by forming a protective film on oral tissues, which may prevent bacterial adhesion and plaque formation. It can assist in reducing oral dryness and providing moisture to oral tissues, alleviating discomfort associated with dry mouth.

Oradox REGENERATE

Product description: Oradox REGENERATE is an advanced mouthwash that supports tissue regeneration after dental surgery and implants. It is a speciality based oral rinse which promotes oral hygiene and is available in orange flavor.

Salient features:

- It is a site specific oral rinse.
- Unique blend of Hyaluronic Acid ,Chlorhexidine, Cyclodextrin and Xylitol.
- Orange flavor alleviates unpleasant taste.
- Reduces plaque formation and prevents gum diseases.
- Has anti-inflammatory, bacteriostatic, anti-oxidant and anti-cariogenic properties.

Key ingredients:

Hyaluronic acid has been shown to have anti-inflammatory action, bacterio-static effect and anti-oxidant property thus making it useful as a long term anti-gingivitis agent.

Chlorhexidine reduces plaque formation, thereby promoting oral hygiene and preventing gum disease.

Cyclodextrin is used in mouthwash to enhance the solubility and stability of active ingredients, promoting their effective delivery and prolonged action in the oral cavity.

Xylitol exhibits Anti-cariogenic properties, inhibits the growth of harmful bacteria and reduces the risk of tooth decay.

Oradox PERIO CARE

Product description: Oradox PERIO CARE is a speciality based oral rinse for comprehensive protection against gingivitis, periodontitis and other gum diseases. It is a superior formulation enriched with Xylitol and VP/VA which helps to promote oral health.

Salient features:

- It is a site specific oral rinse.
- Unique blend of Chlorhexidine, Hespiridin, Naringin and Neoeriocitrin.
- Reduces plaque formation and prevents gum diseases.
- Induces remineralization of enamel and dentine.
- Flavonoids commonly found in citrus fruits helps to reduce inflammation in gums and oral tissues.

Key ingredients:

Chlorhexidine reduces plaque formation, thereby promoting oral hygiene and preventing gum diseases.

Hesperidin is a flavanone glycoside which acts by interacting with collagen matrix and induces enamel and dentine remineralization. This results in stability of collagen matrix and promotes remineralization as collagen matrix acts like a scaffold for deposition of minerals.

Naringin and Neoeriocitrin are flavonoids commonly found in citrus fruits. These compounds have various health benefits, including antioxidant and anti-inflammatory properties. These compounds help in reducing the inflammation in the gums and oral tissues, which is a hallmark of periodontitis.

Oradox WHITENING

Product description: Oradox WHITENING is an advanced alcohol free formula for restoration of natural whiteness and strengthening of teeth.

Salient features:

- Advanced alcohol free formula for restoration of natural whiteness and strengthening of teeth.
- Helps in caries prevention.

Key ingredients:

Tetra potassium Pyrophosphate is a buffering, chelating & oral care agent. It is tartar control agent which removes calcium & magnesium from saliva so they cannot deposit on the teeth.

Sodium Hexametaphosphate is an advanced anti-tartar ingredients which has long-lasting stain inhibiting benefits. Especially prevents the formation of tea/coffee induced stains.

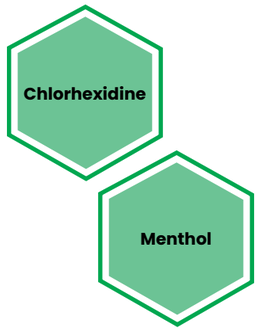

Sodium fluoride prevent tooth decay and strengthen tooth enamel. It works by enhancing remineralization and inhibiting the demineralization process.

PAP$^+$ is a whitening agent that effectively oxidizes & break down stains on the teeth. It is less abrasive & does not demineralized tooth enamel, making it gentler on teeth.

VP/VA in mouthwash can help in maintaining teeth whitening by forming a protective film. It can assist in reducing oral dryness and providing moisture to oral tissues.

Oradox CHLOR-X

Product description: Oradox CHLOR-X helps in Prevention of Gingivitis, Plaque buildup, fungal infection and denture stomatitis. Helps in reduction of aphthous ulcers, mouth & throat infections.

Salient features:

- Helps minimize plaque formation, contributing to overall dental hygiene.
- Reduces inflammation & bleeding of gums.
- Retains its antibacterial activity for several hours after use (substantivity), ensuring prolonged protection.
- Safe for use alongside braces, dentures or other oral appliances.

Key ingredients:

Chlorhexidine reduces plaque formation, thereby promoting oral hygiene & preventing gum disease.

Menthol provides a cooling, minty sensation and freshen the breath. It is also used for its antimicrobial properties that helps kill bacteria and prevent their growth.

Xylitol exhibits anti-cariogenic properties, inhibits the growth of harmful bacteria & reduces the risk of tooth decay.

Presentation: Ref : 80092, 1 x 100ml
Flavor : Fresh Mint

Oradox PerioTone

Product description: Oradox PerioTone is a specialized mouthwash formulated to provide comprehensive treatment for various gum and peri-implant conditions. With unique blend of active ingredients, including Chlorhexidine and Cetyl Pyridinium Chloride, it offers a powerful and effective way to maintain optimal oral health.

Salient features:

- Significantly lowers the bacterial load in the mouth before dental procedures, minimizing the risk of infections.
- Provides instant relief from bad breath (halitosis) during or after the procedure.
- Reduces the risk of cross contamination between the patient & dental team.
- PerioTone not only addresses the existing gum problems but also acts as a preventive measure against future issues.

Key ingredients:

Chlorhexidine reduces plaque formation, thereby promoting oral hygiene and preventing gum diseases.

CPC is a compound that works against the harmful bacteria within dental plaque, making it a useful ingredient in mouthrinses. Specifically, CPC may decrease the plaque's ability to mature and it can help prevention in the growth of the bacteria that cause gum disease.

Oradox WHITENING

Product description: Oradox WHITENING Advanced Zero Sensitivity is a next-generation tooth whitening gel pen designed to deliver visible whitening results without causing tooth sensitivity. Formulated with a gentle yet effective whitening system, it safely lifts and breaks down stains while preserving enamel integrity and patient comfort. Its smooth, fast-acting gel ensures uniform whitening while maintaining the natural strength and smoothness of the enamel surface. It is an ideal solution for achieving a brighter, whiter smile with maximum comfort and confidence—without the fear of sensitivity.

Salient features:

- It effectively lifts and reduces surface stains for a visibly brighter smile.
- Specially formulated to minimize post-whitening sensitivity and discomfort.
- It Preserves enamel integrity while delivering powerful whitening results.
- Easy-to-use gel pen enables targeted, mess-free application.
- Smooth, quick-absorbing formula for efficient whitening with each use.
- Uniform gel distribution ensures even whitening across tooth surfaces.

Key ingredients:

Carbamide Peroxide gently but efficiently removes both surface and deep-set stains. Carbamide peroxide releases whitening action steadily, reducing the risk of irritation. When used as directed, it whitens teeth without compromising enamel strength.

Desensitizing Agent (Potassium Nitrate) helps in block nerve responses triggered during the whitening process. It is ideal for users with sensitive teeth or enamel. It allows effective stain removal without discomfort. It works alongside carbamide peroxide to ensure both whitening effectiveness and user comfort.

Oradox BioEnamel

Product description: Oradox BioEnamel Post-Whitening Care is a specialized gel pen developed for use immediately after teeth whitening procedures. By restoring enamel integrity, it supports the longevity of whitening results while enhancing patient comfort. It is designed to support enamel recovery and relieve sensitivity commonly associated with bleaching treatments. It is an ideal post-whitening care solution to protect enamel, soothe sensitivity, and ensure a comfortable, confident whitening experience.

Salient features:

- Enhances post-whitening comfort while helping preserve the appearance and longevity of whitening outcomes.
- Helps replenish essential minerals lost during whitening, strengthening enamel and enhancing tooth resilience whiteness.
- Provides effective relief from post-whitening sensitivity.
- Helps shield enamel against external irritants and discomfort following bleaching treatments.
- Convenient gel pen design allows precise, mess-free delivery to sensitive areas.
- Simply apply directly to tooth surfaces—no rinsing or complicated steps required.

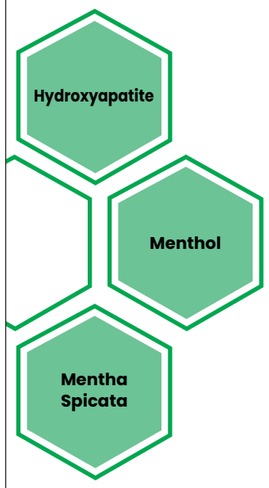

Key ingredients:

Bioglass helps replenish mineral content lost during whitening procedures. It creates a mineralized barrier on the tooth surface that enhances resistance to acid and wear. It reduces sensitivity by sealing microscopic defects and exposed dentinal tubules, it helps alleviate discomfort after bleaching. It works with natural oral chemistry to support ongoing enamel health.

Potassium nitrate Potassium ions penetrate the dentinal tubules and help block nerve signals that cause pain. It helps make post-whitening experiences more comfortable, especially for patients prone to sensitivity. It widely accepted in dental formulations for its proven desensitizing effects. It works alongside BioGlass to not only relieve pain but also promote structural recovery of enamel.
